

Extend your INX InTuition to deliver and monitor training and SCORM compliant assessments online.

INX +LMS FEATURES

- Course completion certificates
- Integrates with INX InTuition
- Upload your own learning content
- Deliver training online anywhere at anytime
- Personalised training plans
- Automatic course enrolments and unenrolments
- Multi-language capability
- Mobile accessible

SIMPLICITY THROUGH AUTOMATION

INX +LMS automatically enrolls people in courses linked to CCP's that can be attained via completing online courses and presents those courses to the user saving you time and improving data accuracy.

TRAINING CERTIFICATES

Upon completion of training and assessments, employees and contractors will automatically receive a completion certificate which is stored against their INX profile.

SHIFT TO REMOTE LEARNING

Support the shift to online training with INX +LMS. Compared to traditional class room training model, this ensures more people can be trained faster and at a much lower cost.

ONLINE ASSESSMENTS

Deliver a blended learning approach to your face to face training by delivering your training assessments online. Assessments are graded automatically by +LMS, freeing up your trainers to concentrate on day to day activities, rather than marking assessments.

PROFILES KEPT UP TO DATE

Upon completing a course, the person's competencies, compliances and procedure records will be automatically updated in INX InTuition.

SAVE TIME AND MONEY

Creating, managing and tracking individual training is time consuming and complex. INX +LMS simplifies this for you through integrated training and course management with profiles automatically being updated.

AUTOMATICALLY UPDATED TRAINING PLANS

People training plans are automatically created and are updated in real-time to ensure everyone has completed the latest online courses and procedures required for their role.

INX Software is a globally trusted leader of fully-integrated environment, health and safety solutions driving the creation of safer, smarter and sustainable workplaces. Our cloud-based software and mobile-capable solutions are standard across high-risk and complex operations including mining, utilities, oil & gas and government sectors, with over 180 enterprise clients and 700,000 users to date. With a global team of industry experts, we enable health, safety and environmental professionals to manage risk, achieve compliance and enhance operational efficiencies across workforce mobilisation and travel logistics, workplace health and safety, environmental and statutory compliance, training and competency management. © 2020
