X

Transform the safety of your workplace by facilitating medical and hygiene outcomes from employees, contractors and visitors.

INX InHealth allows for people to self-serve medical appointments, conduct fit-for-work assessments, as well as pre-plan or even randomly select sample sets for drug, alcohol and COVID-19 screening.

INX InHealth enables you to capture and process all the data you need to manage the health and occupational hygiene of your workforce including simplifying reporting requirements, profiling your workforce into SEGs and outlining contaminant sampling strategies.

Whether you are an occupational hygienist or medical professional, INX InHealth is a valuable tool to transform your compliance and deliver outstanding results for your organisation.

Request a demo or for more information, visit: www.inxsoftware.com/products/inx-inhealth/

## Features

Х

- First aid post management
- Medication and medical condition registers
- Clinic assessments including bookings
- Health calendars
- Similar Exposure Group (SEG) management
- Health monitoring
- Sample scheduling, chain of custody and lab results
- Exposure standards
